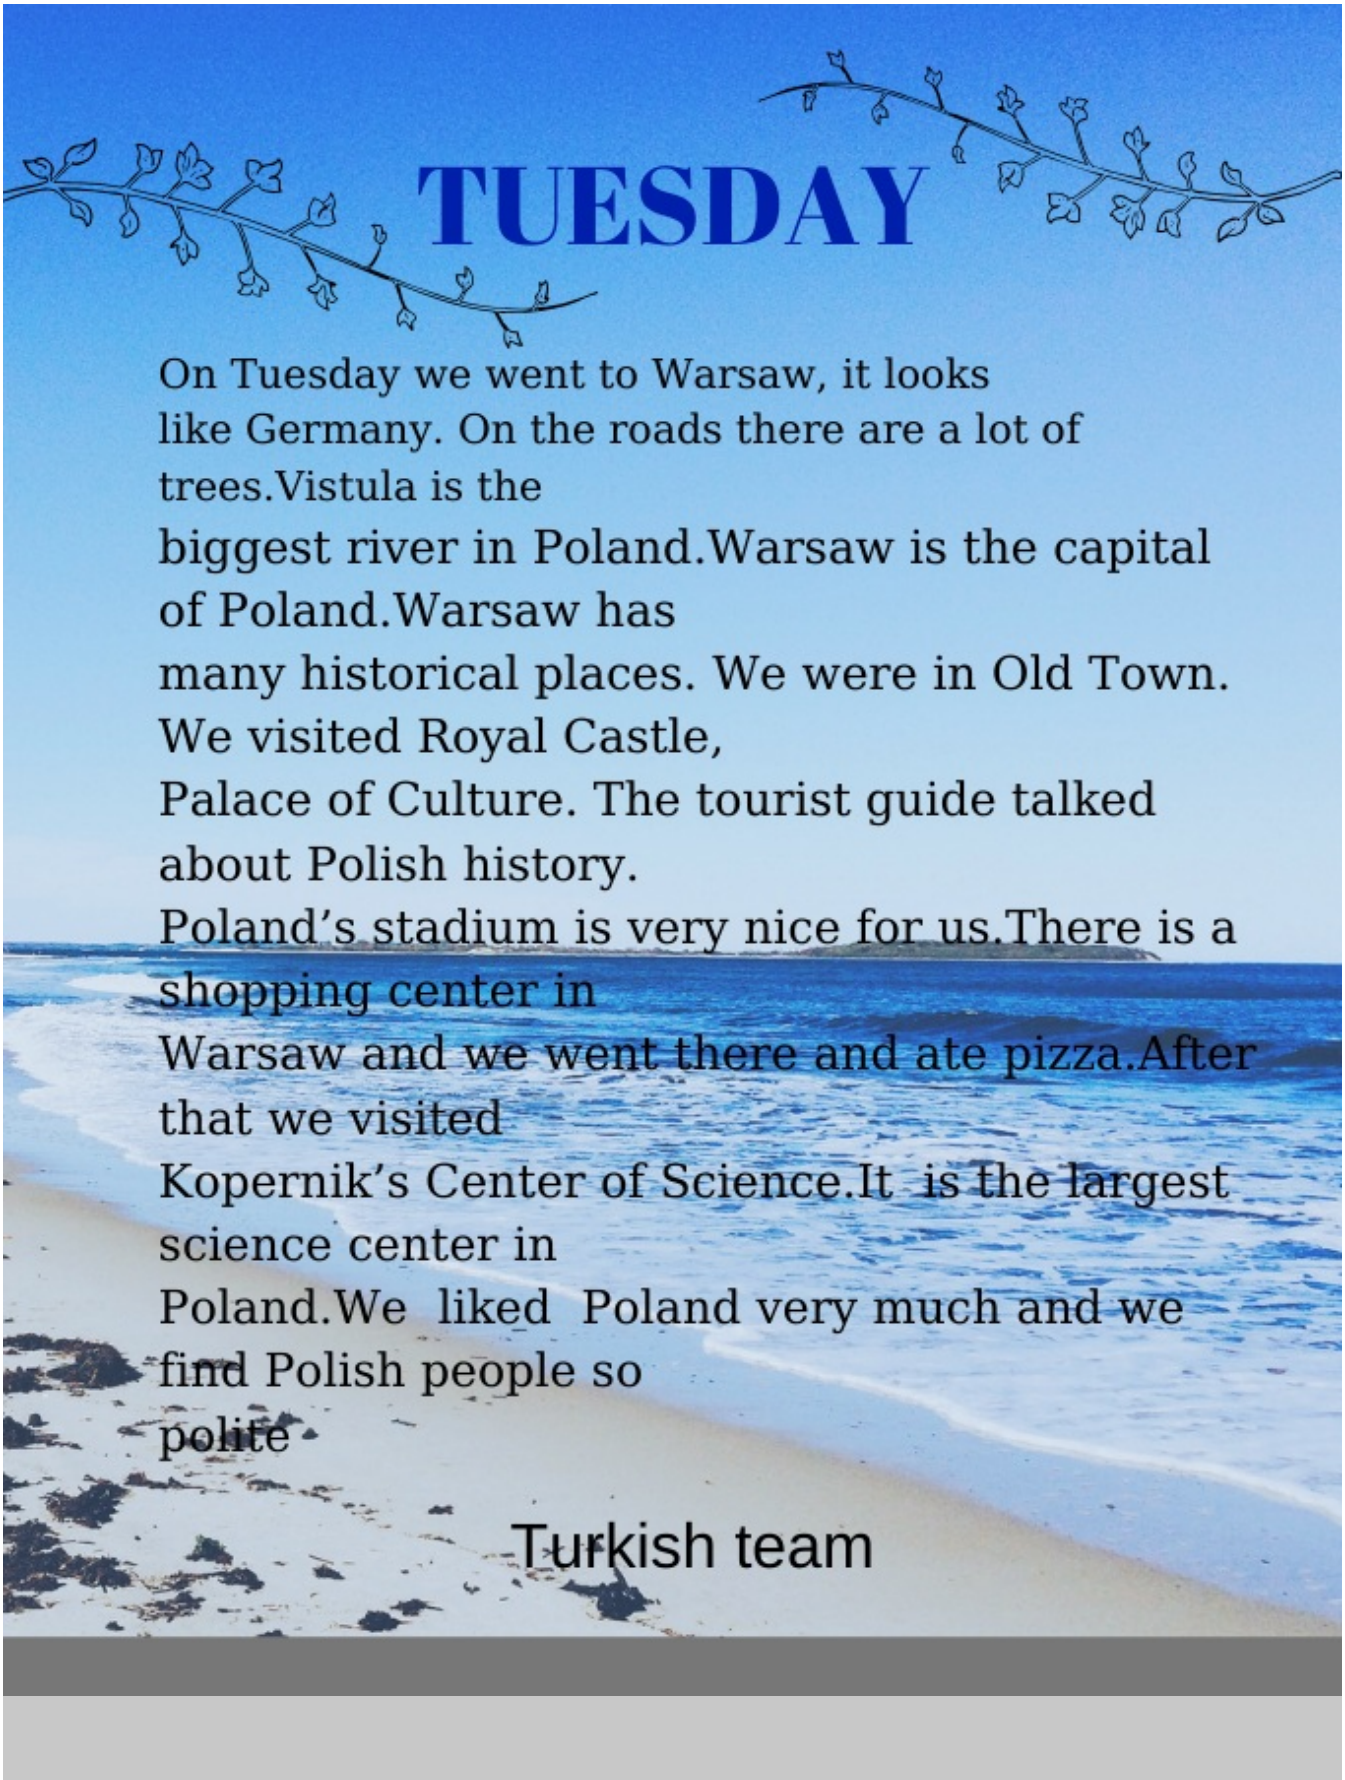
MAŁKINIA, POLAND

INTERNATIONAL NEWSPAPER

MONDAY
We woke up at 6 o'clock and when the clock was 8 we met Polish people.They had show for us.(There was dance,sport,karate and music.) We had so much fun. Then we went to I.T. class and we did a robotic with legos. Then we went to have a lunch at restaurant.we ate soup,pasta,fresh potatoes and chicken with salad. Then we walked into the forest than we played games (2 games) and ate chips with polish,italian,portuguese and romanian people Then we sit near to the campfire and had fun.After these we went to the hotel and go to sleep.



TUESDAY
On Tuesday we went to Warsaw, it looks like Germany. On the roads there are a lot of trees.Vistula is the biggest river in Poland.Warsaw is the capital of Poland.Warsaw has many historical places. We were in Old Town. We visited Royal Castle, Palace of Culture. The tourist guide talked about Polish history. Poland's stadium is very nice for us.There is a shopping center in Warsaw and we went there and ate pizza.After that we visited Kopernik's Center of Science.It is the largest science center in Poland.We liked Poland very much and we find Polish people so polite

Monday and Tuesday

21 october 2019

On the first day we visited the primary school in Malkinia, and we saw a type of show where students presented various talents like:dancing, singing, karate,etc. Also in the morning we had a robotics workshop and we enjoyed it a lot. Then we went for lunch to a Polish Restaurant where we could taste some traditional Polish food. At afternoon after lunch we took a long walk and we went to a kind of grove and the Polish teachers made a little bonfire and prepared some activities we comunicated, same games for us to play, we also enjoyed it a lot.

22 october 2019

On Tuesday, the entire group of Portuguese students woke up and prepared for a trip around Warsaw. The host families took us to school to take the bus to Warsaw. When we arrived in Warsaw we saw that the city is incredibly culturally rich. First we went to the old town, where we were lucky to find an amazing guide who taught us a lot about the city. Then we went to the Palace of Culture, where we got a panoramic view of the city of Warsaw. After lunch we had to take the subway to the Copernicus Science Center, where we did some activities and games that the Science Center offered us. This part of the day was probably our favorite part, because science and physics are areas where our group is curious.

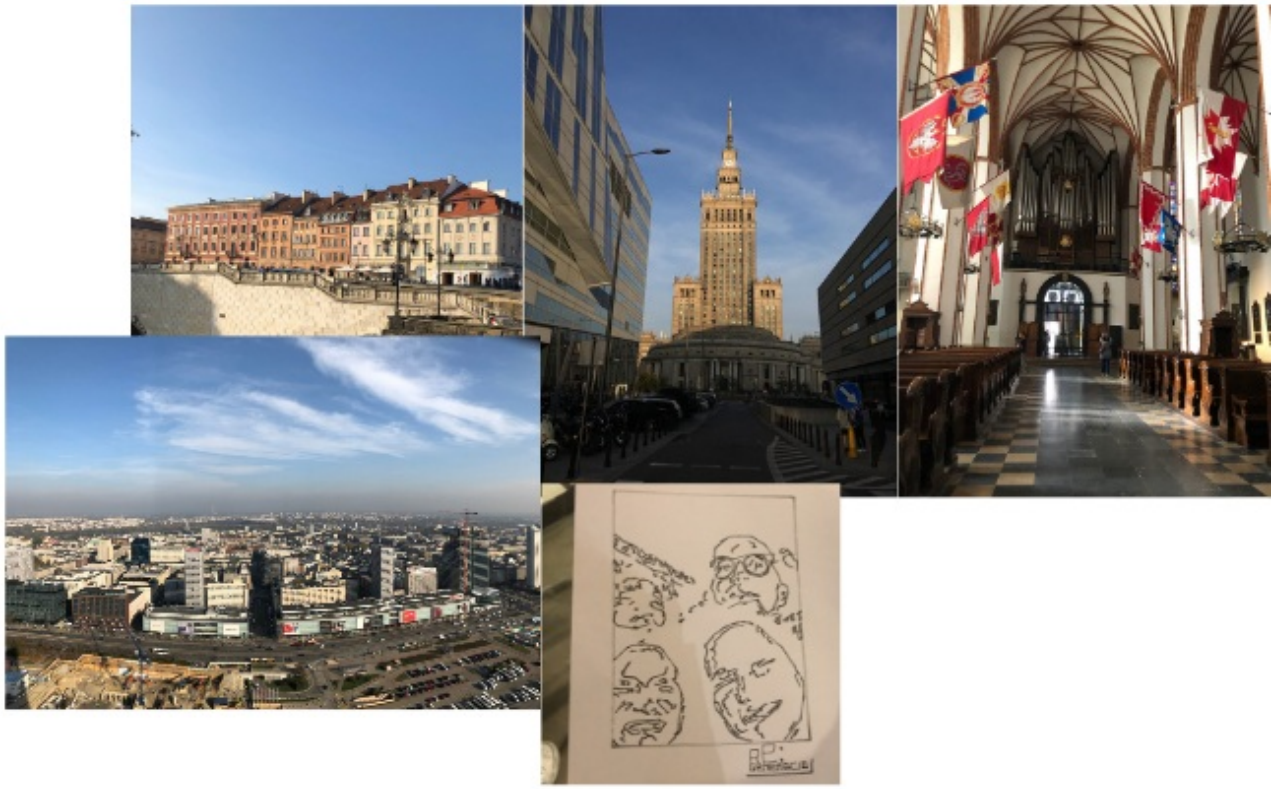
A WEEK IN POLAND

Monday

On Monday we had welcome meeting to the school of Małkinia.The students welcomed us with a presentation of the school activities. Some of the students showed us what to do in the school and offered us the typical Polish food (it is a good food!). At school we did a robotics project and we built a robot with lego: for someone was easy but for others was difficult. In the afternoon we went in a park near a river and we all played and danced together. At dinner we went to the Polish pizzeria (the pizza we ate was good). The day was nice and fun and we met many people from different countries.

Tuesday

On Tuesday, we were in Warsaw to visit the city. We were Italian, Portuguese, Polish and Turkey; but the Romanian group wasn't there because the teacher's car was broken. When we arrived, we went to visit the old city centre of Warsaw, we liked it! It looked old but it was all rebuilt. We went to Royal Castle and Palace of culture. The panoramic view was charming. At 3 p.m. we ate in a Burger King restaurant, after that we walked along Krakowskie Przedmieście street, by the church where Chopin's heart is buried. At half past four we went to the Kopernik's center of science this center was interactive. It was very fun!



Wednesday

On Wednesday we visited the high school in Małkinia Górna. It trade school for cooking, mechanics, sport, transport and ICT. We took part in a cooking workshop and we made pierogi. Do you know what it is? it is a sweet or salty dumpling with a lot of fillings like cabbage, mushrooms, potatoes or fresh cheese. We like this! it is a strange but nice food!

Italian team: Annaluna, Bianca, Elisa, Maddalena, Vittoria and Emanuele

„Our" Erasmus- Poland 2019

Our whole trip started 1 year ago, in Italy when we lived with families.

We were very stressed and scared because it was our a first trip without parents.

We saw this people first time in my life. Our first talk was very awkward because we was very scared. We was recived very warmly by this family. They showed me house around and my room. We've been feeling very well all along the trip. It was very good.

Our next trip was to Romania. It was very beautiful city but we were lived in hotel.

So we didn't had that much experience as then people who were in Italy.

(20th October) Now we have students in our own houses. We met them at Sunday when they arrived to the hotel. We had supper there and we had occasion to talk to them and get to know them a little. Then we took them to our houses we showed them house around and their rooms.

(21st October)
We had welcome meeting and then we had IT workshop. Then we went to the Landscape and we played some games together.

(22rd October)
On Tuesday we went to Warsaw. We were in palace of culture, old town and Kopernik's center of science.

Polish team-
Oliwia, Oliwia, Antek, Maks,
Maks, Wiktoria and others

Day 1

I
came to Poland to participate in the Erasmus + project. On the first day I visited the school for the first time, I met children from other countries and played some games, otherwise I found some information about the school. Afterwards we took a short walk through the forest where we sat around a campfire and communicated.

The next day we stayed at the hotel, but
that didn't stop us from having fun. We played games like ping pong or billiards, we took many pictures and we relaxed, being amazed by the splendor of a river near which we walked.

What is most important is that we had a
nice activity with the robotics club where he built lego robots, programmed them and then played with our creations.

Mr. Felix Godeanu and team of Romania
